```
caffemd.sh [style_name] input
```

ex: (Windows)

```
caffemd default example.md
```

GUI(Java FX)

Click for caffemdgui.bat or caffemdgui.sh .

Scala

```
import jp.cappuccino.tools.markdown.Markdown
...

// Create markdown generator.
val markdown = new Markdown

// Generate HTML.
val source = "# Header\n\nHello, Markdown tool!"
val style = Style.load(".", Style.Default)
val title = "Hello, Markdown!"
val html = markdown.generate(source, style, title)

// Print HTML.
println(html)
```
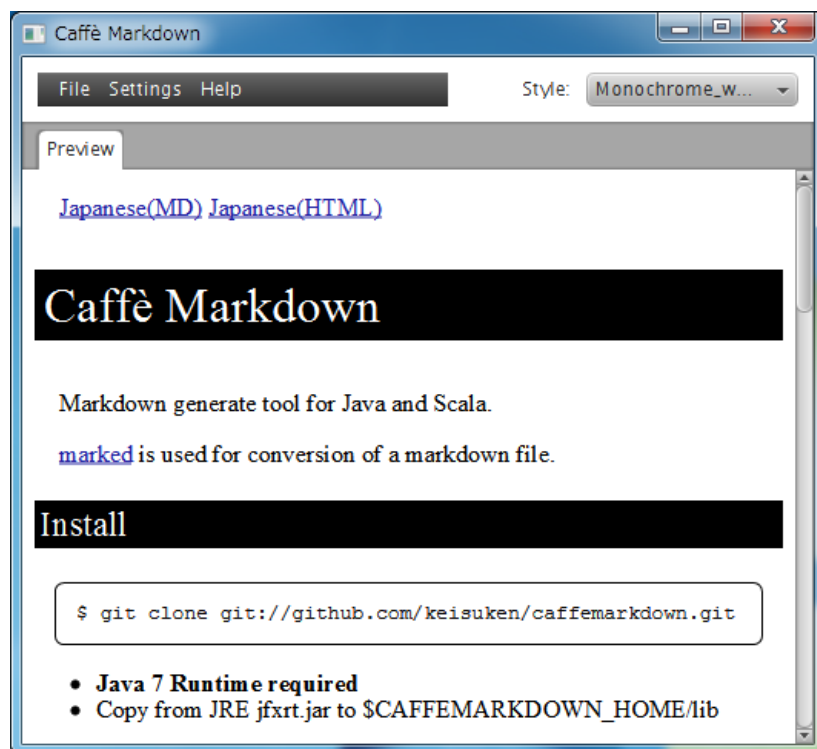

```
import jp.cappuccino.tools.markdown.Markdown
...

// Generate Markdown file.
val home = new File(".")
val styleName = Style.Default
val inpFile = new File("example.md")
val html = Markdown.generate(home, styleName, inpFile)
```

```
// Print HTML.
println(hrml)
```
